# Creepy Crawly Craft

Community Heroes can put in their crafty caps and enjoy creating their own spider web decorations. This activity helps with fine motor development. We can't wait to see what kind of web will you spin together!

## Materials required:

- Paper plate
- Block paint
- Wool
- Hole punch
- Scissors
- Spider

## Instructions:

1. Adult supervision required to cut the inside circle of the plate.
2. Paint the remaining plate black.
3. Using hole punch, insert holes around the inside rim of the plate
4. Thread wool and tie a knot at the back so it cannot go through the hole or stick with tape to the under-side.
5. Weave wool in a random pattern across the plate and through the holes until all holes have been used.
6. Use the spider template below or create your own spider with the spare circle from the paper plate or you could use a cup cake case.
