

CLOUD PLAY DOUGH

Ingredients

750g of corn flour

500ml cheap scented hair conditioner

These two simple ingredients will mix to produce a batch of soft and beautiful smelling play dough which your little Community Hereo can sculpt into whatever their imagination desires.

Method

1. In a bowl, mix the two ingredients together very well.
2. You may need to adjust slightly. If it's too sticky, add a little more flour. If it's too crumbly, add a little more conditioner.

Extra ingredients you can add are:

- Essential oils for extra scents.
- Add colour if you wish to colour your dough.

Once combined well together, you can sculpt your cloud play dough into whatever you wish. You may want to use shape cutters, a rolling pin or just your magical hands.

Once finished playing, you can keep the cloud play dough in an airtight container. The cloud play dough will last about 3 weeks, depending on how much it's used and played with.
