

Let's dress up like Scientists

What is a scientist?

Discuss with your Community Hero what they think a scientist is.

You can help them by explaining Scientists are people who discover new things and research how things work. They observe, measure, and communicate results to people like you and me.

There are many different types of scientists. Below is just a few:

- An astronomer studies stars, planets and galaxies.
- A biologist - studies living organisms. A marine biologist studies ocean plants and animals.
- A meteorologist studies weather and climate.
- A physicist studies matter, energy, and how they are related.

When scientists conduct experiments in laboratories, they wear protective coats and goggles.

If your little Community Hero would like to dress up as a scientist, we have some craft goggles or glasses which can be made (see template below). You can also find a white shirt from an adult in the house which your child can wear as part of their outfit.

Items required

- White Shirt
- Goggles or Glasses (see template below)
- To create a pretend science lab, you can follow our experiments or you can just play with water and plastic Tupperware containers. What will float and what will sink? Find items from around the home and discuss what will sink and what will float. Try find items such as Lego pieces, plastic figurines, a plastic measuring spoon, piece of pasta

Scientist Eyeware

Steps

1. Print & stick onto cardboard
2. Colour & decorate
3. Cut out shapes
4. Cut out lens. You can place cellophane over the lens or leave empty
5. Stick arms to frame
